NEW - UV Cured Glass Fiber Reinforced Plastic (GFRP) Liners

DownStream Services, Inc. brings new trenchless technology to the West Coast. As of May 2008, DownStream Services, Inc. has become an authorized installer of Reline America's Blue-Tek™ UV Cured Glass Fiber Reinforced Plastic (GFRP) Liners.

This cured-in-place (CIPP) technology is vast becoming one of the most viable options for stormdrain and wastewater rehabilitation. The structural design and unique composition of the Blue Tek™ sleeve allow municipalities and private industries to rejuvenate aging infrastructures safely and efficiently, without incorporating chemicals or excavation.
